

**Scottish
Water**

Trusted to serve Scotland

Taking care of your water network

What we are doing?

Over the **next two years**, we'll be carrying out major refurbishment of the spillway channel, including replacement and raising of the road bridge to accommodate shifting weather patterns leading to flood events.

- **Road closure will be in place from June 2025 to allow for removal of bridge.** Communications will be provided on the confirmed date, nearer the time.

Supporting works include.

- Improve the drawdown capacity of the reservoir. This allows us to reduce water levels quickly in the event of an emergency.
- Installation of power and automated valves on the tower outlets to assist with the above.

Where we are working.
